

# WP6 meetings

Dublin 20 October 2014

*“CCCN must be optimized in relation to individual territory and pre - existing facilities”*

Ljubljana 13 January 2015

*“Setting up the informatic and telematic network”*

Next: Berlin 4 June 2015

“Cost analysis and optimizing smooth running of the CCCN”

## *PRE- DRAFT*

### WP6 CHAPTER: INTEGRATED CANCER CONTROL

1. Introduction & Background
2. Planning for a Comprehensive Cancer Control Network (CCCN)
3. Structure and operation of a CCC
4. Governance of a CCCN
5. Care of cancer patients in a CCCN
  - Palliative care
  - Rare Tumors
6. Cancer research in a CCCN
7. Additional developments of the CCCN concept in the EU
  - Quality controls
  - Interface with practitioners  
(Section in preparation )
8. Other.

# WP6 CHAPTER: INTEGRATED CANCER CONTROL

*The hot issue:*

CCCN and CCC

## WP6 CHAPTER: INTEGRATED CANCER CONTROL

### *Definition of a CCCN - 1*

- A CCCN consists of a number of Units belonging to different institutions (at least 3) dedicated to research, prevention, diagnosis, treatment and supportive care for the benefit of cancer patients.
- These Units interact and have stipulated a written agreement to collaborate consistently, in a structured way, with a common governance, in order to pursue their goals more effectively through synergy.
- Within the CCCN the care of patients is the responsibility of inter-professional teams that are multi-disciplinary and tumor-specific. Each team, or tumor management group (TMG) works together for the benefit of patients with that particular type of tumor.

# WP6 CHAPTER: INTEGRATED CANCER CONTROL

## *Definition of a CCCN - 2*

- **A CCCN must have**
  - **standards of care for cancer-specific pathways that are binding for the entire Network;**
  - **a uniform system of quality assurance**
  - **a unified informatic system for optimal exchange of information.**
- **The institutional objective of a CCCN is to provide comprehensive cancer care to all the people living in a certain geographic area**
- **A Cancer Network can be local, regional, national or cross-border.**
- **Interaction among different Networks can be beneficial**
